OTHER PRODUCTS (900-SERIES)

CUTEK

Please contact us for more information

VRI is a proud distributor of CUTEK products.

VRI has tried and tested a vast array of oils and timber sealing products over many years within the commercial carpentry industry and we have stopped at CUTEK for a reason.

'A professional grade wood protector that performs, goes on easily, and highlights your timber's natural beauty...

You have the choice of preserving your timber's character by letting it weather naturally to an attractive silver patina, or retaining its original freshly oiled colour with one of our 10 wood protector colourtones.

Simple, effective and backed by a team of technical experts, Cutek wood finishes are the trusted choice of design and construction professionals around the world, what we like to call, the Cutek difference.' - CUTEK
